| TITLE OF THE ACADEMIC CURRICULAR ACTIVITY: ADVANCED STUDIES IN STOMATOLOGY I STOMATOLOGY | CÓDIGO: CÓDIGO DA DISCIPLINA CPC821 | CARGA HORÁRIA | | |
| | | Teórica | Prática | Total |
| | | 60h | 0h | 60h |
| NATURE (X) Mandatory () Optional | LEVEL: MASTER | | | |
| PROFESSORS: Tarcilia Aparecida da Silva, Felipe Paiva Fonseca, Maria Cássia Ferreira Aguiar and Sílvia Ferreira de Sousa | | | | |
| SYLLABUS: In this course, students will develop the ability to promote clinical diagnosis of oral and maxillofacial lesions through the discussion and presentation of clinical cases, addressing etiopathogenesis, clinical-pathological characteristics, differential diagnoses, and treatment of each process. Students will also enhance their knowledge of oral manifestations of systemic diseases and the interpretation of laboratory tests relevant to clinical practice in Stomatology. | | | | |
| OBJECTIVES: Conduct discussions on clinical cases and scientific articles regarding etiopathogenic aspects, clinical, microscopic, and radiographic characteristics; differential diagnosis; and treatment of the most common lesions affecting the oral and maxillofacial region, as well as the primary oral manifestations of systemic diseases. | | | | |
