

EMENTA

TITLE OF THE ACADEMIC CURRICULAR ACTIVITY: ADVANCED STUDIES IN STOMATOLOGY II	CÓDIGO: CPC822	CARGA HORÁRIA		
STOMATOLOGY		Teórica	Prática	Total

NATURE (X) Mandatory () Optional

LEVEL: MASTER

PROFESSORES: Ricardo Alves de Mesquita, Felipe Paiva Fonseca, Ricardo Santiago Gomez, Wagner Henriques Castro, Ricardo Alves de Mesquita, Felipe Paiva Fonseca.

Syllabus: In the Advanced Studies in Stomatology II course, students will develop the skills to enhance clinical and imaging diagnosis of lesions located in the oral and maxillofacial regions, with a primary focus on highlighting maxillary cysts, odontogenic tumors, and benign fibro-osseous lesions. The course will include theoretical lectures, discussions of clinical cases addressing etiopathogenesis, clinical-imaging characteristics, and differential diagnoses. The treatment of these pathologies will also be discussed, with a particular emphasis on this topic during the discussions.

OBJECTIVES

1. To impart to the students the clinical and imaging aspects of maxillary cysts, odontogenic tumors, and fibro-osseous lesions of the maxillae.
2. To engage in discussions with the students regarding the key treatment concepts and variations related to the lesions covered in the course.
