

## EMENTA

TITLE OF THE ACADEMIC CURRICULAR ACTIVITY:	CÓDIGO: CPC837	CARGA HORÁRIA		
		Teórica	Prática	Total
Clinical and Laboratory Studies in Stomatology and Oral Pathology I		15h	45h	60h

NATURE: ( ) Mandatory ( X ) Optional

LEVEL: Master's or Doctorate

**PROFESSORES:** Ricardo Alves de Mesquita (Coordenador), Tarcília Aparecida de Silva (Subcoordenadora)

**Participantes:** Patrícia Carlos Caldeira, Ricardo Alves de Mesquita, Maria Cássia Ferreira de Aguiar, Ricardo Santiago Gomez, Tarcília Aparecida de Silva, Silvia Ferreira de Sousa, Felipe Paiva Fonseca.

### SYLLABUS:

Clinical and Laboratory Studies in Oral Pathology and Stomatology I In the discipline of Clinical and Laboratory Studies in Oral Pathology and Stomatology I, students will develop the ability to engage in theoretical discussions and critically analyze literature related to clinical, laboratory, and imaging examinations in the fields of Oral Pathology and Stomatology. Supervised practical experience in treating patients with lesions in the oral and maxillofacial regions in the clinic, or alternatively, the description of histopathology slides, will provide students with the desired skills. Additionally, supervised creation of educational materials involving both areas of knowledge mentioned above will also be undertaken by the students.

### OBJECTIVES

1. Discuss with the students the clinical, laboratory, and imaging examinations relevant to or applicable in Stomatology or Oral Pathology;
2. Train the students in the practice of Stomatology or Oral Pathology based on evidence;
3. Train the students in the creation of didactic and instructional materials.
